

Dr. Brenda Stenftenagel

Dr. Brenda's passion for orthodontics is the driving force behind her practice and touches everyone who comes in the door. She had very crooked teeth as a child and she knows how having braces changed her life and having a great smile gave her more **confidence**. She always strives to do the same for her patients!

Dr. Brenda graduated from **Indiana University** in Bloomington, Indiana, with a **Bachelor of Science Degree in Biology**. She received her **Doctor of Dental Surgery Degree** and completed her Orthodontic Postgraduate Residency at **Indiana University School of Dentistry** in Indianapolis.

Dr. Brenda was born in Jasper and moved to northwest Indiana in 1991, following her college graduation. Dr. Brenda was an associate of a large orthodontic group for three years prior to opening her own practice, Braces for All Ages, in 1994.

Dr. Brenda has two beautiful daughters: Isabella and Alana. She often says that being a mother has given her a whole new perspective on orthodontics and is honored by the trust that has been placed in her hands by every parent. In addition to spending time with her family and watching Alana swim, and Isabella play volleyball and sing, Dr. Brenda enjoys being outside working in her flower garden, boating on the lake, waterskiing and going shopping.
